## Continuation Sheet:

The Request for Reconsideration, including amended claims, filed on January 28,2005 in response to the final rejection has been considered but is not deemed to place the application in condition for allowance.

As detailed in the final rejection mailed on November 30, 2004, Aube' et al. (U.S. Patent No. 6,672,240) discloses a docking light system (Figure 2) meeting the limitations of claims 11 and 12. In addition, Wiggerman (U.S. Patent No. 5,339,225) discloses a docking light system meeting the limitations of Claims 13-17 and 20.

Regarding Claim 11, the claim does not include the limitation "forward looking white navigation lights with 225 degree horizontal spread" for the spread light. Further, the specification does not define the mastlight in definite terms. Further, the specification also states "On boats under 12 meters in length, it is permissible to combine the masthead light and the stern light into a single 360 degree all around' light" (Page 5, lines 20-23). Therefore, a docking light system disclosed by Aube' et al. (U.S. Patent No. 6,672,240) meets the limitations recited in claims 11 and 12.

As detailed in the Final Office action, Wiggerman ('225) discloses a docking light system (Figure 1) meeting the limitations of claims 13-15 with following teaching. The docking light system comprising

- a docking light fixture 10 receiving a docking lamp 40; and a navigation light 35 provided on the docking light fixture 10 (Figure 1, column 3, lines 20-22, and 50-52);
- the navigation light 35 being a masthead light positioned in the bow region of the boat- (Figure 1, column 3, lines 27-34); and
- the navigation light 35 being a stern light positioned in the stern region of the boat- (Figure 1, column 3, lines 27-34).

Please refer to the last office e action for additional details supporting the claimed of the instant application.
